## MANA POOLS - ATTRACTIONS

Mana Pools is known for its diverse and numerous species of flora and fauna, particularly those present on the "flood plain". Animals to be seen include elephant, eland, buffalo, kudu, lion, leopard, painted dog, hippo, hyena and crocodiles. Birding enthusiasts have the opportunity of seeing "lifers" such as the Livingstone Flycatcher, Bohm's Spinetail, Racket Tailed Rollers, African Skimmers, Pels Fishing Owls, Three Banded Courser, Lilians Lovebirds, Narina Trogon and Orange Winged Pytilia amongst the approximately 400 species that visit the Park in the different seasons.

For all guests, particularly the photographers, a huge experience is enjoying the "Blue Haze/Gin Haze" a phenomenon created by the refraction of light through the trees and dust in the atmosphere. The magnificent, widely active Zambezi River offers an experience that words fail to describe with walks on the banks, canoeing, fishing (catch and release) or sundowners merely sitting watching the water and life passing by.

## MANA RIVER CAMP

This camp originated as a family run safari business and the name Mwinilunga (pronounced Mwee-nee-loonga) is taken from the Mwinilunga district which is very close to the border where Zambia, Angola and the DRC meet. This is home to where the spring between the rocks and the water berry trees, forms the very beginning of the Mighty Zambezi River. Being a family run business, it was originally such named as it seemed appropriate that beginning of life begins with family.

## THE CAMP

Mana River Camp is positioned on the banks of the mighty Zambezi River nestled between this enormous perennial river and a much visited water pan, particularly enjoyed by elephants for mud bathing.

Shade in the camp is provided by riverine forest predominately *Trichilia Emetica* and the fabled *Faidherbia Albida* (apple ring or Anna Tree)

The beauty of this camp is that it is a mobile tented camp known as a TEC – Temporary Extended Camp. The whole camp is taken down at the end of each season, before the wet season begins. This gives the feeling of the old, real bush, camping experience. The camp is unfenced and many different animals may be viewed from the camp, whilst enjoying the tranquil atmosphere. Common visitors into camp are elephants. These giant pachyderms seem to want to introduce themselves to guests.

Being part of the Machaba Family, we have the great benefit of having our permanent sister camp, Ingwe Pan, based further inland at the Ingwe Pan in Mana Pools.
